

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental organization that consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, stationed in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer requirements.

With a system consisting of over 90 autonomous sellers, the lift truck group supplies quality materials handling equipment to the broad North American marketplace. Doosan Infracore America Forklift dealers successfully operate in over 220 service and product sales locations all through Canada and the U.S. The forklift product line impressively features 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck versions vary from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, due to its outstanding level of product performance and their consistently high level of consumer support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Initial sales of this manufacturing equipment focused on large business groups, the armed services and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a position of substantial growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling industry. This plan radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a contemporary plant which helped set up the business for the manufacture of high end added-value goods suitable for export. In 1993, the company had a international sales system and started exporting models they had developed through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international markets.
