

## Clark Forklift Parts

Clark Forklift Parts - Currently, there are no less than 350,000 Clark lift trucks performing globally, and upwards of 250,000 in commission in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual parts built for 20 exclusive designs of lift trucks and automated equipment. Your regional Clark Supplier is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving productivity and benefiting performance.

Globally, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional commitment to safety is at this time a customary feature on every forklift.

Clark's continual goal to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the globe to be certified with the globally approved quality standard ISO 9001 for each and every one of their production facilities. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental limitations, thus placing them in a prevailing industry position.

Clark has chosen the particularly economical and advantageous structure of "Lean Manufacturing" for its assembly facilities and use of resources. This system was developed to acknowledge the most efficient method of production facility management and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing expenses. The new value engineering program combines innovative product improvement and delivers superior customer support and service within the industry.
