

## Barrel Clamp

Barrel Clamps - Referred to as "Barrel Clamp", this particular hydraulic attachment is utilized on lift trucks so as to clutch items which you need to move using the forklift. Normally, they're used in order to barrels, handle kegs, and paper rolls, along with some barrel clamp designs having the ability to rotate the cargo. Like for example, the rotate function permits the person operating the forklift to be able to insert a vertically stored paper into the horizontal intake of a printing press.
